

Notice of Study Commencement

County of Renfrew and Town of Petawawa Petawawa Class Environmental Assessment Study

The County of Renfrew, in association with the Town of Petawawa, initiated Phases 3 and 4 of the Class Environmental Assessment (EA) Study in November 2011 for new improvements to the Transportation Network in the Town of Petawawa as described in the Phase 1 and 2 Report for the Petawawa Transportation Study, completed in 2008. The works may include short, medium and long range improvements including a possible new crossing of the Petawawa River.

This study will identify and document the alternatives and the preferred design in accordance with the requirements for a Schedule 'C' project under the *Municipal Class Environmental Assessment* document.

One public information centre will be held during the study to provide an opportunity for the public to review and discuss the project with representatives of the Project Team. A notice advertising the public information centre will be published in local newspapers.

Upon completion of this study an Environmental Study Report will be available for public review and comment. A notice of study completion will be published at that time.

There is an opportunity at any time during the EA process for interested persons to provide comments. Any comments received pertaining to the study will be collected under the *Environmental Assessment Act* and, with the exception of personal information, will become part of the public record.
